No means no.
Whenever. Whatever. Anywhere.

Men.

1. When a woman says NO, do not keep trying. You must understand and assume she does **not want** a sexual approach. It does not matter if you have talked, danced or had a drink together before.
2. The insistence to establish a non-consensual physical relation, unwanted touching, kisses or bodily approaches... are also sexual violence.
3. **If you are in a group, do not be an accomplice of sexual harassment:**

Do not participate in conversations or behaviors which humiliate or underestimate women.

Cooperate to eradicate sexist attitudes in your closest environment, be critical and question this type of attitudes.
